manual lever on the front of the control module. The rigidly mounted hand grip provides firm support for the operator. Machine Direction. Machine direction is controlled by a pivoting knob which can be actuated by the thumb of the left hand. Rotating the knob up moves the machine forward. Rotating the knob down moves the machine in reverse.

Specalog for 587T Pipelayer, AEHQ5679-01

Caterpillar uses robotic welding techniques in the assembly of the case and frames. This insures quality and reliability throughout the structure. Robotic welding provides deep penetration and consistency for long life, and reduces the chance for errors that may be made during manual welding. Roller Frames. Roller frames are tubular,
