Cellular Respiration

Lab Report

Instructions: In this laboratory activity, you will calculate the rate of cellular respiration in germinating and non-germinating peas using a respirometer to measure the amount of oxygen consumed. You will also investigate the effects of temperature, light, or seed type on the rate of respiration.

Cellular

Respiration Lab

Introduction: Cellular respiration is the release of energy from organic compounds by metabolic chemical oxidation in the mitochondria in each cell. Cellular respiration involves a number of enzyme mediated reactions. The equation for the oxidation glucose is $C_6H_{12}O_6 + O_2 \rightarrow CO_2 + H_2O + 686$ kilocalories per ...
