Data And The City Regions
In the bottom up, inductive approach, the city-regions emerge from the full set of commuting data through an algorithm which simultaneously optimizes the boundaries on the basis of a size of employment criterion and a minimum threshold of self containment of flows to workplaces.

City-Region
To shed light on this question, Jonathan Gray and myself have published a new report titled "Data And The City: How Can Public Data Infrastructures Change Lives in Urban Regions?" We are interested in how city data infrastructures can support public participation around local governance and policy-making. The report demonstrates how public data infrastructures create new kinds of relationships and public spaces between public institutions, civil society groups, and citizens.
