The engine itself is a 60° V6 with features such as Variable Cylinder Management (VCM) system and VTEC. The most well-known engine in this family is the Honda J35 and it's installed on several different Honda models. We know how popular this engine is as an engine swap for older Honda models, although, it's not as popular as something like the B-Series or K-Series.

Honda J35: Everything You Need to Know | Specs and More

The intake valve diameter is 35 mm, exhaust valve - 30 mm; valve stem diameter is 5.5 mm. It was equipped with a variable geometry intake manifold (Honda's 2-stage PPA intake manifold made from aluminum and composite material) and a 60 mm throttle body. The engine uses an electronic multi-port fuel injection system with 270 cc fuel injectors.
