Hp Array Configuration Hardware Setup

Description. The HP Array Configuration Utility is a web-based application that helps you configure HP ProLiant SMART-2 Array Controllers, HP ProLiant Smart Array Controllers, HP ProLiant Integrated Smart Array Controllers, and HP ProLiant StorageWorks RAID Array Controllers. You can use the Array Configuration Utility for several tasks such as configuring the array controller initially, adding disk drives to an existing configuration, or to reconfigure your array controller.

Drivers & Software - HPE Support Center.

Click Array Configuration Utility on the left-hand side of the screen. ACU opens, and identifies the controllers that are connected to the system. This process could take a minute or two.
