In 2014 his sixth book, "Rational Expectations: Asset Allocation for Investing Adults" was published. It updated his earlier books on investing to cover the position after the Great Financial Crisis (GFC) of 2008-09, and the most recent research on investing, including that by Elroy Dimson, Paul Marsh, and Mike Staunton, authors of "Triumph of the Optimists".

William J. Bernstein - Wikipedia

An investor who wants to save for a down-payment on a house in 10 years will obviously have a more conservative asset allocation than an investor who is saving for retirement 40 years into the future. Asset allocation is usually colloquially described as a ratio of stocks to fixed income, e.g. 60/40, meaning 60%

Rational expectations : asset allocation for investing adults. [William J Bernstein] -- Rational Expectations is a clean sheet of paper in the wonky world of quantitatively based asset allocation aimed at small investors.

Rational expectations : asset allocation for investing ...

In Rational Expectations, he broadly defines three groups of investors by their behavior: Group 1: The average small investor, who does not have a coherent asset-allocation strategy and who owns a chaotic mix of mutual funds and/or individual securities, often recommended to him or her by a broker or advisor. He or she tends to buy near bull market peaks and sell near bear market troughs.
