Before that, there's 640x480, commonly referred to as standard definition (SD).

The basics of image resolution - Vimeo Blog

Sometimes the incoming signal format is smaller than the native resolution of the display. For example, let's assume you have a native XGA resolution projector, and you are displaying a standard NTSC television signal. In this case, your projector has a native 1024x768 pixel array. But a regular NTSC television signal is only 640x480 pixels.
