SolarWinds Database Performance Analyzer for Oracle is designed to prioritize and assist with tuning tasks. The Oracle database management software can help identify root causes of bottlenecks, providing diagnoses and recommendations. Address resource-intensive operations and improve performance in real time with DPA.

Oracle Database Management Tools | SolarWinds

Database optimization software like SolarWinds Database Performance Analyzer is built to not only provide tuning suggestions, but also track the results of your tuning for optimal growth. Since SolarWinds DPA is a comprehensive database optimization tool, its solutions aren't limited to tuning readjustment.

Database Optimization Tool and Techniques | SolarWinds

These system requirements define the minimum requirements for NPM 2020.2 and products on Orion Platform 2020.2. Products may have different requirements, such as OS or memory, and may differ per license level. These requirements include hardware, software, database, and port requirements.

NPM 2020.2 System Requirements - SolarWinds

SolarWinds Customer Success Center provides you with what you need to install, troubleshoot, and optimize your SolarWinds products: product guides, support articles, documentation, trainings, onboarding and upgrading information.

SolarWinds Product Support | Success Center

Download and install Database Performance Analyzer. With no agents, installation typically takes less than 20 minutes, and does not require a reboot. Configure the repository. Select your repository—either Oracle or SQL Server. Register your databases. Register your database instances, availability groups, and Real Application Clusters.

Application, Database, and Server Monitoring | SolarWinds

SolarWinds offers a number of on-premises and SaaS network, systems, database, security, IT service, and applications monitoring and management tools through a subscription model. See the table below for a list.

Licensing Options | SolarWinds

SolarWinds NPM Review "All of the SolarWinds products work hand in hand. So the data collected by any of the tools, and can be accessed on the 1 device page view. The products all play part of a successful monitoring solution. And when reporting, all the data that is collected by the different tools, can be displayed on the 1 report."
