Strongyloidiasis A Major Roundworm Infection Of Man

stercoralis is a human pathogenic parasitic roundworm causing the disease

strongyloidiasis. Its common name in the US is threadworm. In the UK and Australia, however, the term threadworm can also refer to nematodes of the genus Enterobius, otherwise known as pinworms.. The Strongyloides stercoralis nematode can parasitize humans.

Strongyloides stercoralis - Wikipedia

Strongyloidiasis is transmitted through direct penetration of human skin by infective larvae when in contact with soil; walking barefoot is therefore a major risk factor for acquiring the infection. Strongyloides
